# Make it yours in 15 minutes.

Each template is a single HTML file. No builder, no plugins, no code skills needed.

1

## Open the file

Double-click the .html file to preview it in any browser. Pick the niche closest to your client.

2

## Swap the words

Open it in any text editor and replace the headline, benefits, reviews, and FAQ with your client's. The structure does the selling.

3

## Drop in their brand

Change the logo name, swap the one accent colour at the top of the file, and replace the hero image with the client's product photo.

4

## Put it live

Upload to any host, or paste into your page builder. Point the buttons at the checkout, and you're done.

## Don't want to touch the code? I'll build it for you.

If a client wants one built properly, fast, at a level that makes them ask "who did this for you?", that part's me. You bring the client, I build behind the curtain, you keep a cut.
